

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1.-12. (Cancelled).
13. (Currently Amended) A vehicle seat comprising:
 - a seat part (2);
 - a backrest (3) and
 - an electric drive (6) coupled to the seat part (2) and backrest (3), wherein the backrest (3) is moved relative to the seat part (2) in one of a fold-over function and an inclination-adjusting function by adjusting the speed of the electric drive (6) in such a manner that a different speed can be set in each case for one of the inclination-adjusting function and for the fold-over function.
14. (Currently Amended) The motor vehicle seat as claimed in claim 13 wherein the electric drive (6) has two adjusting speeds, a higher speed being provided for the foldover function and a lower speed being provided for that of the inclination-adjusting function.
15. (Previously Presented) The motor vehicle seat as claimed in claim 13 wherein the foldover function and the inclination-adjusting function each have a dedicated adjusting characteristic.
16. (Previously Presented) The motor vehicle seat as claimed in claim 13 wherein the inclination of the backrest (3) can be changed in the inclination-adjusting function by the electric drive (6) in a stepwise manner.
17. (Previously Presented) The motor vehicle seat as claimed in claim 13 wherein the electric drive (6) has an electric motor (9) which is common to all of the adjusting functions.

18. (Previously Presented) The motor vehicle seat as claimed in claim 13 wherein the electric drive (6) has one of an electronic torque limitation and a mechanical torque limitation.

19. (Previously Presented) The motor vehicle seat as claimed in claim 13 wherein the seat part (2) has at least one seat occupation sensor (13).

20. (Previously Presented) The motor vehicle seat as claimed in claim 19, wherein the seat occupation sensor (13) is functionally connected to the electric drive (6) in such a manner that, when the seat is occupied, the foldover function is blocked while the inclination-adjusting function is not blocked.

21. (Currently Amended) The motor vehicle seat as claimed in claim 13 wherein, in the foldover function, the electric drive (6) can be actuated from the seat and a dashboard - by a first operating switch (11), and can be actuated from ~~the trunk~~ a second location by a second operating switch (12) and, in the inclination-adjusting function, can be actuated from the seat. ~~in particular from the front seat region.~~

22. (Currently Amended) The motor vehicle seat as claimed in ~~claim 13~~ claim 26 wherein one of the backrest (3) and backrest parts (4, 5) is folded over by wireless remote control.

23. (Previously Presented) The motor vehicle seat as claimed in claim 13 wherein the electric drive (6) is a combination of a motor and transmission.

24. (Currently Amended) The motor vehicle seat as claimed in claim 26 ~~claim 13~~ wherein the electric drive (6) is positioned ~~in the vicinity~~ proximate of one end (8) of an axis of rotation (7) and is integrated in one of the backrest (3) ~~and a~~ and the backrest part (4, 5).

25. (Previously Presented) The motor vehicle seat of claim 16, wherein the electric drive (6) is an electric stepping motor.

26. (New) The motor vehicle seat of claim 13, wherein the backrest (3) includes a first backrest part (4) and a second, smaller backrest part (5).
